Introduction:

The State of Kuwait and the GCC countries are undergoing developments and acceleration towards technology, artificial intelligence and digital transformation in all governmental, private and charitable institutions and facilities, which has made it one of the most important priorities of the Gulf governments, including the State of Kuwait, to place these topics within their strategic priorities to achieve sustainable development in Kuwait's vision and in parallel with government projects aimed at benefiting from smart transformation and technology in the state's sectors. It is no secret that the fields of artificial intelligence are among the fastest growing fields in the world and are witnessing tremendous transformations in practical uses and advanced technology, especially in the field of crisis and disaster management, innovation and security sectors, and they cover more aspects of life day after day, which explains why countries and institutions are racing to explore this field and delve into its details to ensure a suitable position in the world of the future. The government has set smart and digital transformation steps as its top priorities and has developed many plans and strategies that have placed it at the forefront of advanced countries in technology and artificial intelligence. The state has anticipated the future early by moving forward towards a secure smart and digital world through an advanced infrastructure that allows for the provision of distinguished and diverse content covering various aspects of life, which contributes to the transfer and exchange of knowledge and services worldwide. The Corona pandemic came to enhance this transformation and enhance technology.
